

**2026 Surgery Consent Form**

Owner's Name: \_\_\_\_\_ Date Printed: \_\_\_\_\_

Pet's Name: \_\_\_\_\_ Sex: \_\_\_\_\_

Procedure(s): \_\_\_\_\_

Primary Contact number for today: \_\_\_\_\_

Emergency Contact number for today: \_\_\_\_\_

**NOTE:**

***Any procedure done under The \$499 Neuter and \$599 Dental/Spay promotion does not include medications/e-collar to go home or any additional procedures (including dental extractions, or dental radiographs. Please see dental radiograph consent form for more information.)***

If your pet's pre-surgical bloodwork shows they are not eligible for surgery, you will still be responsible for the cost of the bloodwork (\$100) and the pre-anesthetic exam (\$40). Additional surcharges apply for larger pets due to increased material use, anesthetic needs, and monitoring time: \$110 for pets over 60 lbs and \$215 for pets over 90 lbs. If your pet is in heat at the time of her spay, there is an additional \$95 surcharge, which is added on top of any applicable weight surcharge, due to the increased anesthetic requirements and surgical time involved.

All pets must have proof of current rabies vaccination, or they must receive one during their visit today at a cost of \$31.00

**Owner's Initials:** \_\_\_\_\_

CONSENT: I authorize Pets R Family Animal Hospital (also referred to as "PRFAH") veterinary staff to perform the above-mentioned medical procedure(s) and/or treatment(s) on my pet. I acknowledge and understand that unknown and unanticipated risks and complications always exist with animals going under anesthesia and/or surgery, which could result in injury to my pet, including the possibility of death. I indicate with my signature, my consent to the above procedure(s) and that all questions have been answered to my full satisfaction and that I understand any risk associated with my pet's procedure(s).

**Owner's Initials:** \_\_\_\_\_

**PAYMENT DUE AT TIME OF SERVICE:** We accept Visa, Mastercard, Discover, American Express, Care Credit, Debit, Cash. ***NO CHECKS ARE ALLOWED.***

### **Consent for Evaluation and Treatment of Self-Inflicted Trauma**

I, the undersigned pet owner, understand that if my pet is exhibiting behaviors that may include self-inflicted trauma, specifically through repetitive chewing or biting of the cage bars. These behaviors have resulted in injuries such as trauma to the jaw, teeth, paws, nails, or even a fractured jaw. The veterinary staff will evaluate these injuries and may recommend treatment for the following:

- **Dental and Jaw Injuries:** Including fractures, tooth damage, or other trauma due to excessive chewing.
- **Paw and Nail Damage:** Resulting from compulsive or repetitive behavior such as biting or chewing at the cage bars.
- **Behavioral Assessment:** To determine the underlying cause of the self-harming behavior, such as anxiety, stress, or compulsive tendencies.

I understand and agree that Pets R Family Animal Hospital will not be held responsible for the self-inflicted injuries sustained by my pet as a result of its behavior. I acknowledge that these behaviors are outside the control of the clinic and that the hospital is not liable for the occurrence or progression of such injuries.

I consent to the necessary diagnostic procedures, medical treatment, and behavioral consultations that the veterinary team deems appropriate for the health and well-being of my pet. I understand that the treatment plan may include behavioral modifications, medications, or other interventions to address the underlying causes of my pet's behavior, in addition to treatment for the physical injuries sustained.

**PRE-OPERATIVE CARE:** I certify that my pet has not eaten any food and drank decreased liquids since midnight last night. If there is a possibility that my pet had more than the recommended amount of water or eaten anything past midnight, it is requested by PRFAH's veterinary staff to reschedule the procedure due to an increased risk of complications that can arise from a pet's aspiration while under sedation, anesthesia, or while recovering from anesthesia.

**Owner's Initials:** \_\_\_\_\_

**Disclaimer:** I understand that PRFAH cannot be held accountable for the Loss/Damage to any belongings (covers/pillows/beds/leashes/collars) left with my pet. Pets R Family is open from 9am-7pm Monday-Friday and 9am-3pm on Saturday. Late pick up (10 minutes after closing) will incur a \$65 'late pick up' fee due to holding staff over. If owner is no call/no show at 7pm the pet will be left in a kennel w/ food and water overnight an \$85 boarding fee will be incurred. Owner will be able to pick up at opening the next morning.

**Owner's Initials:** \_\_\_\_\_

**EMERGENCY TREATMENT:** I understand and have been advised that, during the performance of the above-mentioned procedure(s), unforeseen conditions and circumstances might arise or might be revealed that necessitate (1) an extension of the above procedure(s) and/or (2) different procedure(s) being required in addition to the above-mentioned medical procedure(s). In case of emergency or additional treatment, I understand that PRFAH will make every attempt to contact me by phone. However, depending on the circumstance, in the event that they are unable to contact me prior to rendering emergency treatment on my pet, the following decisions have been made by me regarding the rendering of emergency and/or resuscitative care and treatment to my pet:

**MUST SELECT:**

PRFAH's staff has my permission to provide any emergency treatment and/or treatment and care as the attending veterinarian or technician deems necessary. Initial one of the following;

☐ Yes, staff has my permission to do the following above. I agree to pay for all related fees associated to such emergency care and/or treatment.

☐ No, staff does not have permission to do the following above.

**ADDITIONAL SERVICES: I would like the following additional services performed on pet today**

☐ Home Again Microchip (\$52.45)    ☐ Ear Cleaning (19.65)    ☐ Nail Trim (\$13.25)

☐ 4DX (Heartworm/Lyme/Ehrlichia/Anaplasma) Test (\$72.00)    ☐ Laser Therapy for faster healing results (\$22.25)

**ADDITIONAL ADVANCED DIAGNOSTIC TESTING: I would like the following additional services performed on pet today BEFORE surgery.**

☐ FELINE HEART ProBNP (\$92.24) - For cats over 5 years old or prone to heart disease, we recommend the proBNP test to measure levels of a hormone released by the heart under stress, helping to detect early signs of heart problems like heart failure. It's a non-invasive way to assess heart health and enable timely intervention.

☐ CANINE HEART PROBNP (\$92.24) - For dogs over 7 years old or those prone to heart disease, (Dobermans, Cavalier Spaniel, Chihuahua, etc) we recommend the proBNP test to measure hormone levels released by the heart under stress. This non-invasive test helps detect early signs of heart problems, such as heart failure, enabling timely diagnosis and management.

☐ Radiographs (X-rays) - are an optional service that can provide valuable insight before surgery. While not required, they can help identify any underlying issues that may affect anesthesia or the procedure, allowing us to ensure the safest plan possible for your pet.

ADDITIONAL CONCERNS or ALLERGIES?

---

---

### **How are laser treatments administered?**

During a treatment session, the handheld laser wand is slowly moved back and forth over the damaged tissue, producing a warm, pleasant sensation that most pets seem to enjoy and find relaxing. Sessions usually last 15 to 30 minutes, with the number of sessions and frequency of treatments dependent on the injury. Chronic conditions may be treated weekly, whereas surgical incisions and open wounds often require daily treatment.

### **Is laser therapy safe for pets?**

Laser therapy is safe if performed correctly, using the proper settings and treatment durations. Higher-powered units can cause thermal burns to tissues if used incorrectly. Also, laser beams directed at an eye can cause permanent retinal damage, so patients and all veterinary staff must wear protective goggles during treatment.

### **Laser therapy**

Helps tissue repair and faster surgery healing process by causing the following:

- Endorphin release
- Vasodilation, which increases blood flow to bring in oxygen and cells involved in the healing process -Muscle relaxation
- Faster healing and repair
- Decreased inflammation
